Established in 1993 caroline & friends in Marylebone High Street gathers together the work of artisans and craftsmen from around the world into an eclectic collection of beautiful gifts and accessories. In '93 the world seemed a much bigger place, finding something unusual anywhere in 24 hours was relatively simple. Now we can be almost anywhere in 24 hours and talk directly to people in places where even 15 years ago phones were unreliable or non-existent and letters took weeks to arrive.

Our products, since the beginning have been handcrafted by individuals and small companies. Working together for many years, Caroline knows her suppliers personally. She meets with the artisan or someone who knows them well as often as possible and business contacts have become friendships.

Far from depersonalising relationships modern technology has improved communications with our suppliers to the extent that we are able to work together with a market to tailor products to contemporary taste, whilst maintaining and preserving traditional skills and small scale enterprise across the globe. Creating these close working relationships with our suppliers means we are now able to source or commission a wide range of hand crafted items to meet your specific requirements. From Kashmiri shawls that can be hand embroidered to your choice of design and dyed to perfectly match an outfit, through to commissioning and producing bespoke stationery for your specific event. When you need to be different, we will be delighted to help you achieve your aim.

We are a group of complementary therapists drawn to work together in Marylebone High Street by the synchronicities of life. Today we inhabit a very special place in time and space, we are privileged to be living in a world where we have a chance to participate in the creation of a dream; a new and better world where we live in harmony with each other and our environment.

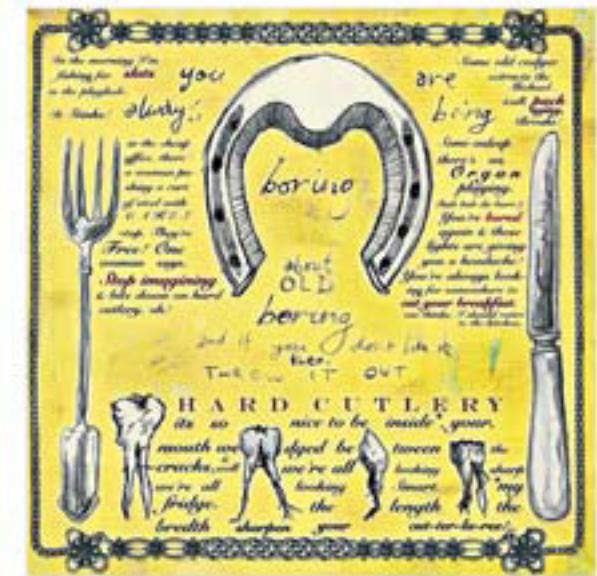

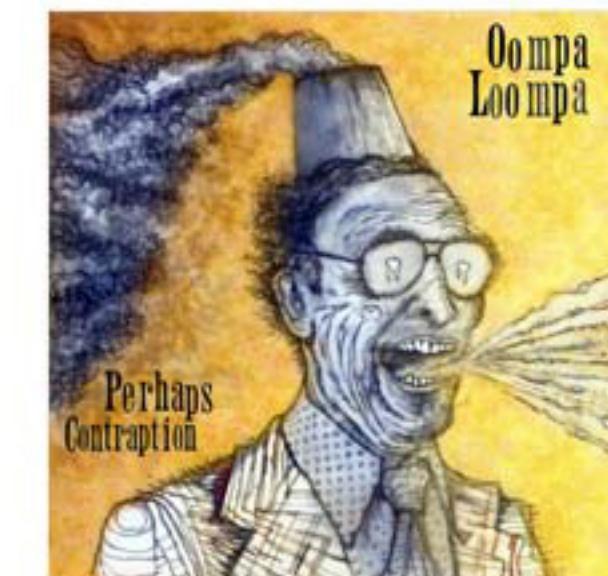

This process is best started from within, as all of your perceived experience is a reflection of yourself.

Mahatma Ghandi said, "be the change you want to see"

All our practitioners have been through life changing experiences and have skills in complementary and energy medicine; we now offer these skills to aid you in the challenges of change.
